SAFETY DATA SHEET
Electrically Conductive RTV Adhesive part 2

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
Product name  Electrically Conductive RTV Adhesive part 2
Product number  72-00139, 72-00345A, 72-00244C, 72-11002, 72-00039, 72-00036

1.2. Relevant identified uses of the substance or mixture and uses advised against
Identified uses  Conductive adhesive.
Uses advised against  No specific uses advised against are identified.

1.3. Details of the supplier of the safety data sheet
Supplier  Chomerics Europe Parker Hannifin Ltd., Seal Group
          Unit 6 Century Point
          Halifax Road, High Wycombe
          Bucks, HP12 3SL
          United Kingdom
Manufacturer  Parker Hannifin France SAS
              Etablissement de Saint-Ouen-L'Amoune.
              6/8 Avenue du Vert Galant
              95310 Saint-Ouen L'Aumône
              FRANCE
              +33 134 32 39 00

1.4. Emergency telephone number
Emergency telephone  001-352-323-3500 (INFOTRAC - US) (24h)

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture
Classification
Physical hazards  Not Classified
Health hazards  Skin Corr. 1B - H314 Eye Dam. 1 - H318
Environmental hazards  Not Classified

Classification (67/548/EEC or 1999/45/EC)  C; R34

2.2. Label elements
Pictogram

1/12
Electrically Conductive RTV Adhesive part 2

Signal word
Danger

Hazard statements
H314 Causes severe skin burns and eye damage.

Precautionary statements
P260 Do not breathe vapour/spray.
P280 Wear protective gloves/protective clothing/eye protection/face protection.
P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310 Immediately call a POISON CENTER/doctor.
P501 Dispose of contents/container in accordance with national regulations.

Contains
3-Aminopropyltriethoxysilane

Supplementary precautionary statements
P264 Wash contaminated skin thoroughly after handling.
P301+P330+P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P321 Specific treatment (see medical advice on this label).
P363 Wash contaminated clothing before reuse.
P405 Store locked up.

2.3. Other hazards
This product does not contain any substances classified as PBT or vPvB.

SECTION 3: Composition/information on ingredients

3.2. Mixtures

The Full Text for all R-Phrases and Hazard Statements are Displayed in Section 16.

SECTION 4: First aid measures

4.1. Description of first aid measures

General information
Get medical attention immediately. Show this Safety Data Sheet to the medical personnel. Chemical burns must be treated by a physician.

Inhalation
Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.
Electrically Conductive RTV Adhesive part 2

Ingestion
Rinse mouth thoroughly with water. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person.

Skin contact
It is important to remove the substance from the skin immediately. Take off immediately all contaminated clothing. Rinse immediately with plenty of water. Continue to rinse for at least 15 minutes and get medical attention. Chemical burns must be treated by a physician.

Eye contact
Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.

Protection of first aiders
First aid personnel should wear appropriate protective equipment during any rescue. If it is suspected that volatile contaminants are still present around the affected person, first aid personnel should wear an appropriate respirator or self-contained breathing apparatus. Wash contaminated clothing thoroughly with water before removing it from the affected person, or wear gloves. It may be dangerous for first aid personnel to carry out mouth-to-mouth resuscitation.

4.2. Most important symptoms and effects, both acute and delayed

General information
See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.

Inhalation
Corrosive to the respiratory tract. Symptoms following overexposure may include the following: Severe irritation of nose and throat.

Ingestion
May cause chemical burns in mouth, oesophagus and stomach. Symptoms following overexposure may include the following: Severe stomach pain. Nausea, vomiting.

Skin contact
Causes severe burns. Symptoms following overexposure may include the following: Pain or irritation. Redness. Blistering may occur.

Eye contact
Causes serious eye damage. Symptoms following overexposure may include the following: Pain. Profuse watering of the eyes. Redness.

4.3. Indication of any immediate medical attention and special treatment needed

Notes for the doctor
Treat symptomatically.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media
The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture

Specific hazards
Containers can burst violently or explode when heated, due to excessive pressure build-up. Severe corrosive hazard. Water used for fire extinguishing, which has been in contact with the product, may be corrosive.

Hazardous combustion products
Thermal decomposition or combustion products may include the following substances: Toxic and corrosive gases or vapours. Carbon dioxide (CO2). Carbon monoxide (CO). Nitrous gases (NOx). Oxides of the following substances: Silicon.

5.3. Advice for firefighters
Electrically Conductive RTV Adhesive part 2

Protective actions during firefighting
Evacuate area. Keep upwind to avoid inhalation of gases, vapours, fumes and smoke. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. Avoid discharge to the aquatic environment. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities.

Special protective equipment for firefighters
Regular protection may not be safe. Wear chemical protective suit. Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures
Personal precautions
Keep unnecessary and unprotected personnel away from the spillage. Provide adequate ventilation. Use suitable respiratory protection if ventilation is inadequate. Wear protective clothing as described in Section 8 of this safety data sheet. Do not touch or walk into spilled material. Avoid contact with skin and eyes. Wash thoroughly after dealing with a spillage.

6.2. Environmental precautions
Environmental precautions
The product may affect the acidity (pH) of water which may have hazardous effects on aquatic organisms. Avoid discharge to the aquatic environment. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).

6.3. Methods and material for containment and cleaning up
Methods for cleaning up
If leakage cannot be stopped, evacuate area. Wear protective clothing as described in Section 8 of this safety data sheet. Approach the spillage from upwind. Contain and absorb spillage with sand, earth or other non-combustible material. The contaminated absorbent may pose the same hazard as the spilled material. Place waste in labelled, sealed containers. Flush contaminated area with plenty of water. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. Wash thoroughly after dealing with a spillage.

6.4. Reference to other sections
Reference to other sections
For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling
Usage precautions
Read and follow manufacturer's recommendations. Immediate first aid is imperative. Keep away from food, drink and animal feeding stuffs. Wear protective clothing as described in Section 8 of this safety data sheet. Handle all packages and containers carefully to minimise spills. Keep container tightly sealed when not in use. Do not handle broken packages without protective equipment. Do not reuse empty containers.

Advice on general occupational hygiene
Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.

7.2. Conditions for safe storage, including any incompatibilities
Electrically Conductive RTV Adhesive part 2

Storage precautions
Store in accordance with local regulations. Store in tightly-closed, original container in a dry, cool and well-ventilated place. Keep containers upright.

Storage class
Corrosive storage.

7.3. Specific end use(s)
The identified uses for this product are detailed in Section 1.2.

SECTION 8: Exposure Controls/personal protection

8.1. Control parameters

Occupational exposure limits
Ethanol
Long-term exposure limit (8-hour TWA): WEL 1000 ppm  1920 mg/m³
WEL = Workplace Exposure Limit

8.2. Exposure controls

Protective equipment

Appropriate engineering controls
Provide adequate ventilation. Observe any occupational exposure limits for the product or ingredients. Use process enclosures, local exhaust ventilation or other engineering controls as the primary means to minimise worker exposure. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimise exposure.

Eye/face protection
Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. Wear tight-fitting, chemical splash goggles or face shield.

Hand protection
Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. Wear protective gloves made of the following material: Butyl rubber. To protect hands from chemicals, gloves should comply with European Standard EN374. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected.

Other skin and body protection
Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.

Hygiene measures
Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. Warn cleaning personnel of any hazardous properties of the product.

Respiratory protection
If ventilation is inadequate, suitable respiratory protection must be worn. Ensure all respiratory protective equipment is suitable for its intended use and is ‘CE’-marked. Check that the respirator fits tightly and the filter is changed regularly.

Environmental exposure controls
Keep container tightly sealed when not in use. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
**Electrically Conductive RTV Adhesive part 2**

### SECTION 9: Physical and Chemical Properties

#### 9.1. Information on basic physical and chemical properties

- **Appearance**: Liquid.
- **Colour**: Clear.
- **Odour**: Amine.
- **Odour threshold**: No information available.
- **pH**: Not determined.
- **Melting point**: Not determined.
- **Initial boiling point and range**: Not determined.
- **Flash point**: 93.1°C
- **Evaporation rate**: Not determined.
- **Flammability (solid, gas)**: Not relevant.
- **Upper/lower flammability or explosive limits**: Not determined.
- **Vapour pressure**: Not determined.
- **Vapour density**: Not determined.
- **Relative density**: 0.95
- **Solubility(ies)**: No information available.
- **Partition coefficient**: No information available.
- **Auto-ignition temperature**: Not determined.
- **Decomposition Temperature**: Not determined.
- **Viscosity**: Not determined.
- **Explosive properties**: Not considered to be explosive.
- **Oxidising properties**: Does not meet the criteria for classification as oxidising.

#### 9.2. Other information

- **Volatile**: <20%

### SECTION 10: Stability and reactivity

#### 10.1. Reactivity

**Reactivity**: There are no known reactivity hazards associated with this product.

#### 10.2. Chemical stability

**Stability**: Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.

#### 10.3. Possibility of hazardous reactions

**Possibility of hazardous reactions**: No potentially hazardous reactions known.

#### 10.4. Conditions to avoid

**Conditions to avoid**: Avoid excessive heat for prolonged periods of time.
Electrically Conductive RTV Adhesive part 2

10.5. Incompatible materials

**Materials to avoid**

10.6. Hazardous decomposition products

**Hazardous decomposition products**

Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Corrosive gases or vapours.

<table>

</thead>
</table>

11.1. Information on toxicological effects

**Acute toxicity - oral**

Notes (oral LD₅₀)

Based on available data the classification criteria are not met.

ATE oral (mg/kg)

2,486.67

**Acute toxicity - dermal**

Notes (dermal LD₅₀)

Based on available data the classification criteria are not met.

**Acute toxicity - inhalation**

Notes (inhalation LC₅₀)

Based on available data the classification criteria are not met.

**Skin corrosion/irritation**

Animal data

Skin Corr. 1B - H314 Causes severe burns.

**Serious eye damage/irritation**

Serious eye damage/irritation

Corrosive to skin. Corrosivity to eyes is assumed.

**Respiratory sensitisation**

Respiratory sensitisation

Based on available data the classification criteria are not met.

**Skin sensitisation**

Skin sensitisation

Based on available data the classification criteria are not met.

**Germ cell mutagenicity**

Genotoxicity - in vitro

Based on available data the classification criteria are not met.

**Carcinogenicity**

Carcinogenicity

Based on available data the classification criteria are not met.

**Reproductive toxicity**

Reproductive toxicity - fertility

Based on available data the classification criteria are not met.

Reproductive toxicity - development

Based on available data the classification criteria are not met.

**Specific target organ toxicity - single exposure**

STOT - single exposure

Not classified as a specific target organ toxicant after a single exposure.

**Specific target organ toxicity - repeated exposure**

STOT - repeated exposure

Not classified as a specific target organ toxicant after repeated exposure.

**Aspiration hazard**

Aspiration hazard

Based on available data the classification criteria are not met.

**General information**

The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Electrically Conductive RTV Adhesive part 2

Inhalation
Corrosive to the respiratory tract. Symptoms following overexposure may include the following: Severe irritation of nose and throat.

Ingestion
May cause chemical burns in mouth, oesophagus and stomach. Symptoms following overexposure may include the following: Severe stomach pain. Nausea, vomiting.

Skin contact
Causes severe burns. Symptoms following overexposure may include the following: Pain or irritation. Redness. Blistering may occur.

Eye contact
Causes serious eye damage. Symptoms following overexposure may include the following: Pain. Profuse watering of the eyes. Redness.

Route of entry
Ingestion Inhalation Skin and/or eye contact

Target organs
No specific target organs known.

Reproductive toxicity - development
Maternal toxicity; Developmental toxicity: - LOAEL: 600 mg/kg/day, Oral, Rat
REACH dossier information. Based on available data the classification criteria are not met.

SECTION 12: Ecological Information

Ecotoxicity
Not regarded as dangerous for the environment. However, large or frequent spills may have hazardous effects on the environment.

12.1. Toxicity
Toxicity
Based on available data the classification criteria are not met.

Ecological information on ingredients.

3-Aminopropyltriethoxysilane

Toxicity
Based on available data the classification criteria are not met.

Acute toxicity - fish
LC₅₀, 96 hours: >934 mg/l, Brachydanio rerio (Zebra Fish)

Acute toxicity - aquatic invertebrates
EC₅₀, 48 hours: 331 mg/l, Daphnia magna

Acute toxicity - aquatic plants
EC₅₀, 72 hours: 603 mg/l, Scenedesmus subspicatus

12.2. Persistence and degradability
Persistence and degradability
The degradability of the product is not known.

Ecological information on ingredients.

3-Aminopropyltriethoxysilane

Persistence and degradability
The product is biodegradable.

Phototransformation
Air - DTₜ₀ : 0.2 days

Stability (hydrolysis)
pH4 - Half-life : 0.8 hours @ 24.7°C
pH7 - Half-life : 8.5 hours @ 24.7°C
pH9 - Half-life : 0.15 hours @ 24.7°C

Biodegradation
Water - Degradation 67%: 28 days

12.3. Bioaccumulative potential
Bioaccumulative potential
No data available on bioaccumulation.

Partition coefficient
No information available.

Ecological information on ingredients.

3-Aminopropyltriethoxysilane

Bioaccumulative potential
BCF: 3.4, Cyprinus carpio (Common carp) The product is not bioaccumulating.

Partition coefficient
log Pow: 1.7

12.4. Mobility in soil
Electrically Conductive RTV Adhesive part 2

**Mobility**
Volatile liquid. The product contains organic solvents which will evaporate easily from all surfaces.

**Ecological information on ingredients.**

3-Aminopropyltriethoxysilane

**Mobility**
The product is soluble in water.

12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB assessment
This product does not contain any substances classified as PBT or vPvB.

**Ecological information on ingredients.**

3-Aminopropyltriethoxysilane

Results of PBT and vPvB assessment
This substance is not classified as PBT or vPvB according to current EU criteria.

12.6. Other adverse effects

Other adverse effects
None known.

**SECTION 13: Disposal considerations**

13.1. Waste treatment methods

**General information**
The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.

**Disposal methods**
Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents. Incineration or landfill should only be considered when recycling is not feasible.

**SECTION 14: Transport information**

14.1. UN number

| UN No. (ADR/RID) | 2735 |
| UN No. (IMDG) | 2735 |
| UN No. (ICAO) | 2735 |
| UN No. (ADN) | 2735 |

14.2. UN proper shipping name

**Proper shipping name (ADR/RID)**
AMINES, LIQUID, CORROSIVE, N.O.S. (3-AMINOPROPYLTRIETHOXYSILANE)

**Proper shipping name (IMDG)**
AMINES, LIQUID, CORROSIVE, N.O.S. (3-AMINOPROPYLTRIETHOXYSILANE)

14.3. Transport hazard class(es)
Electrically Conductive RTV Adhesive part 2

ADR/RID class 8
ADR/RID classification code C7
ADR/RID label 8
IMDG class 8
ICAO class/division 8
ADN class 8

Transport labels

14.4. Packing group
ADR/RID packing group II
IMDG packing group II
ADN packing group II
ICAO packing group II

14.5. Environmental hazards
Environmentally hazardous substance/marine pollutant No.

14.6. Special precautions for user
EmS F-A, S-B
ADR transport category 2
Emergency Action Code 2X
Hazard Identification Number (ADR/RID) 80
Tunnel restriction code (E)

14.7. Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code Not relevant.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture
National regulations Health and Safety at Work etc. Act 1974 (as amended).
The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations 2009 (SI 2009 No. 1348) (as amended) [*CDG 2009*].
EH40/2005 Workplace exposure limits.
Electrically Conductive RTV Adhesive part 2

EU legislation
Dangerous Preparations Directive 1999/45/EC.
Dangerous Substances Directive 67/548/EEC.

15.2. Chemical safety assessment
No chemical safety assessment has been carried out.

Inventories
EU - EINECS/ELINCS
None of the ingredients are listed or exempt.

SECTION 16: Other information

Training advice
Only trained personnel should use this material.
