Shieldex® Hygienic Gloves

wearable disinfection

Shieldex® Hygienic Gloves are the ideal and environmentally friendly alternative for daily use. Ordinary latex gloves leave not only damp but also swollen hands and end up in the trash after a single use.

Protection from germs

In addition to aerosol transmission, there is an increased risk of infection via contaminated surfaces. Equipped with the unique technology of Shieldex®, the Hygienic Gloves have an antimicrobial and temperature-regulating effect due to the 99% pure silver in the textile.

Since Shieldex® Hygienic Gloves are washable, they are the ideal and environmentally friendly alternative for daily use. Ordinary latex gloves leave not only damp but also swollen hands and end up in the trash after a single use.

Perfect use for

- All everyday applications
- Wholesale and retail
- Logistics
- -Transport & Traffic
- Travel
- Sensitive and delicate skin
- Skin diseases: wear inside out for neurodermatitis

Effectiveness

The cloth develops its self-disinfecting effect through the worldwide unique metallization process, which anchors the silver in the textile so strongly that it even withstands strong abrasion forces. The silver permanently releases ions into the environment, creating a surface that is hostile to germ survival.

Already before, during and after putting on the gloves and a possible contamination, viruses and bacteria are demonstrably inactivated within a short time¹ and even during longer wearing time the textile has a pleasant cooling effect on the skin.

The material contains no artificial chemicals and is also suitable for baby skin according to OEKO-TEX® Standard 1.

1. Istituto Zooprofilattico delle Venezie (Result of November 2020 available on request)
2 Material: 78% silver metallized polyamide 6 (nylon) and 22% elastomer

For big and small hands

Shieldex® Hygienic-Gloves are available in different sizes (XS-L). Due to the stretchy material² they are also suitable for large hands!

Washing instructions

Hand wash recommended, alternatively gentle cycle at 30 °C, use mild soap, do not bleach, air dry recommended

Silver is a biocidal active ingredient according to §67 EU Biocide Regulation.
