

Protecting your electronics
Trusted materials, tailored solutions

Who we are

For 40 years, HITEK has been supporting aerospace, defence, and industrial customers with proven electronic protection materials.

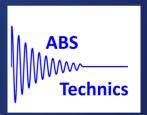

We connect customer challenges with worldclass technologies, offering fast, bespoke solutions backed by partnerships with trusted suppliers such as Henkel and Parker Chomerics.

Our purpose is clear: to safeguard the performance of mission-critical electronics with dependable solutions, responsive service, and technical expertise.

Who we represent

shielde<u>x</u>

Our capabilities

At HITEK, we do more than supply materials — we deliver solutions tailored to your application:

In-house fabrication

XY cutting, die-cutting, and precision shaping for gaskets, thermal pads, and microwave absorbers.

Splicing services

Bespoke O-rings manufactured to your specifications and crafted without tooling costs and with lower minimum order quantities.

Form-in-place gaskets

Conductive and non-conductive options for complex shapes and watertight seals.

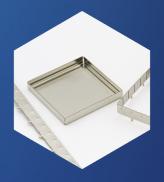

Shielded enclosures

Portable enclosures for testing, verification, and secure communications made from highly conductive fabrics.

Precision metal parts

Custom-fabricated shielding components for demanding applications.

Decanting and down-packing

Exclusive UK capability for Henkel adhesives and encapsulants, reducing waste and improving safety.

Stockholding

UK-based materials in stock for shorter lead times and supply chain resilience.

Our product portfolio

Conductive elastomers, gaskets, vents, form-in-place gaskets, shielded enclosures, board-level shielding, and precision metal parts.

Structural, conductive, non-conductive, and thermally conductive adhesives; potting compounds for environmental and mechanical protection.

Gap pads, thermal pastes, phase-change materials, and custom-cut thermal solutions.

Industrial based adhesives built to handle production line systems and fast paced environments.

Conductive Yarns and Fabrics

Shieldex fabrics and yarns for EMI shielding in medical, clothing, and technical textile applications.

Broadband absorbers, cavity absorbers, and form-in-place solutions for radar, satellite and communications.

Markets we support

Aerospace

Aerospace systems demand ultra-reliability. HITEK ensures materials perform exactly as needed, every time.

Military

In field operations, there's no room for failure. HITEK helps military technology stay mission-ready.

When reliability is national security, HITEK ensures electronics are protected and resilient.

Industry

Industry needs dependable partners and HITEK keeps production moving with precision and consistency.

Accreditations and commitment

Our customers trust us because quality, compliance, and responsibility are at the heart of what we do:

- AS9100D | ISO 9001 | ISO 14001 | ISO 45001
- Qualified to MIL-DTL-83528 QPL 9-2008
- JOSCAR and Cyber Essentials certified
- Materials in stock for faster supply
- 69% carbon reduction (2024)
- 80% of fleet electric
- Active fundraising for community causes
- Ongoing investment in apprenticeships and leadership development

Powered by people

Our team is the strength behind HITEK. From business development to technical expertise, every project benefits from a personable, responsive approach.
