Copper-Tape
from

Just stick it on. Protect from viruses!

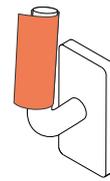

Acts immediately and demonstrably against viruses and bacteria

self-disinfecting, flexible application

Inactivates 99.98 % of the Corona viruses in minutes*

Door
handles

Window
handles

Others*

* Push handles. Handrails, shopping carts and much more.

The ion release of copper significantly shortens the survival time of viruses, bacteria and fungi. Due to its positive properties, hospitals, for example, also use solid copper door handles. Our three-dimensionally copper-plated textile has a 7-fold higher ion release compared to solid copper. After only a few minutes, this enables a demonstrable inactivation of 99.98% of corona viruses, among others*.
